Sub: "International Summer & Winter Term (ISWT)" at IIT Kharagpur

Sir,

Enclosed please find 2(two) copies of the brochure for the second International Summer and Winter Term (ISWT) to be held during May-July 2015 and December 2015. Indian Institute of Technology Kharagpur started its first (ISWT) in 2014 where national and international participants got an opportunity to seek knowledge and experience from reputed International faculty through intensive study of subjects and personal interactions. The overwhelming response to the first International Summer and Winter Term (ISWT) in 2014 has led to the second one to be held during May-July 2015 and December 2015.

Participants from Industry, Research Organizations, Faculty and Students from all over the world are welcome to register for the 10 subjects being offered during the summer term and 13 subjects during the winter term. These subjects are designed around current and multidisciplinary themes of Science, Engineering, Management and Law. The duration for each subject is of 2 weeks or 10 working days with a judicious blend of lectures and tutorials per day.

Indian Institute of Technology Kharagpur will issue a course completion certificate to all participants who attend classes regularly. The students registered for these courses, optionally, will have the opportunity to obtain additional academic credits based on the evaluation and grading process. His/her home university/Institute will be mainly responsible for transferring ISWT academic credits. IIT Kharagpur will only provide information on the grading system, subject syllabus, and the academic policy.

Kindly give this brochure a wide circulation so that students and faculty members of your Institution become aware of the programme and come forward to register for the same.

Thanking you,

In
