

In this research monograph we relate organizational variables such as personality, culture, strategy and structure to many new emerging topics such as information technology and systems, knowledge management, project management and innovations. We raise important research issues in this short volume; and hope that management community will address these issues in their future research. Every effort was made to ensure that we are contributing to knowledge.

RRK Sharma

Prof. RRK Sharma has 29 years of teaching and research at IIT Kanpur 208016 India. He has published 279 articles and has published 2 books. He is HAG Scale Full Professor at IIT Kanpur India.
