

Department of Industrial & Management Engineering Indian Institute of Technology, Kanpur

M.Tech Information Brochure (Batch 2017-19)

ABOUT DEPARTMENT

Set up in 1974, the Department of Industrial and Management Engineering (IME) at IIT Kanpur is one of the first in the country to recognize the strength of combining the training of engineers with management education. The class being a heterogeneous mix of engineers from diverse fields naturally enriches the learning environment, turning it into a fountainhead of vibrant ideas.

The **MTech** program is the **flagship program** of IME department. It is one of the oldest to introduce industrial engineering in India. The program provides a perfect blend of industrial engineering and management science to its students. The well-defined structure of course work and a year-long thesis work provides in-depth knowledge of concepts to students. The intervening summer internships is used for practical project work in industries.

The program focuses on developing expertise in **Analytics** and **Operations** fields. It covers diverse topics from both the management and engineering paradigms. **Statistical modelling**, improvement of productivity, quality and profitability in the manufacturing sector, **supply chain management** and application of **optimization techniques** and **Business Intelligence tools** in economics, finance, marketing and IT are some of the areas to which students are exposed.
