

INDUSTRIAL VISIT TO TATA MOTORS LUCKNOW

The 2017-19 M.Tech batch went for an industrial visit to Tata Motors Lucknow, Truck Assembly Plant after the first semester on 28th November 2017.

The students got to understand the practical implementation of concepts like assembly line balancing, just in time, testing and quality control.

The visit became even better learning experience with the active participation of students who flooded the engineers at Tata Motors with good questions on how industrial operations work, the assembly and planning issues faced by them and so on.

All together the visit was a worthwhile experience and we look forward to have such visits more frequently in the future.

We are grateful to Mr. Prashant Pandey for making necessary arrangements from the Tata Motors side. We thank Professor Avijit Khanra and Professor Deepu Philip for organizing the visit.
