One Stop Solution for Virtual Events

Note

- Please note the slides below is only to give an idea of the structure of Online platform we will be using for poster presentation and Invited talks. Few changes may happen compared to what is shown in the slides. However the basic structure will remain the same.
- More detailed information will be shared in due course (closer to the Conference Dates).

Platform for Poster Presentation (Structure)

a) Each poster presenter has a separate table.

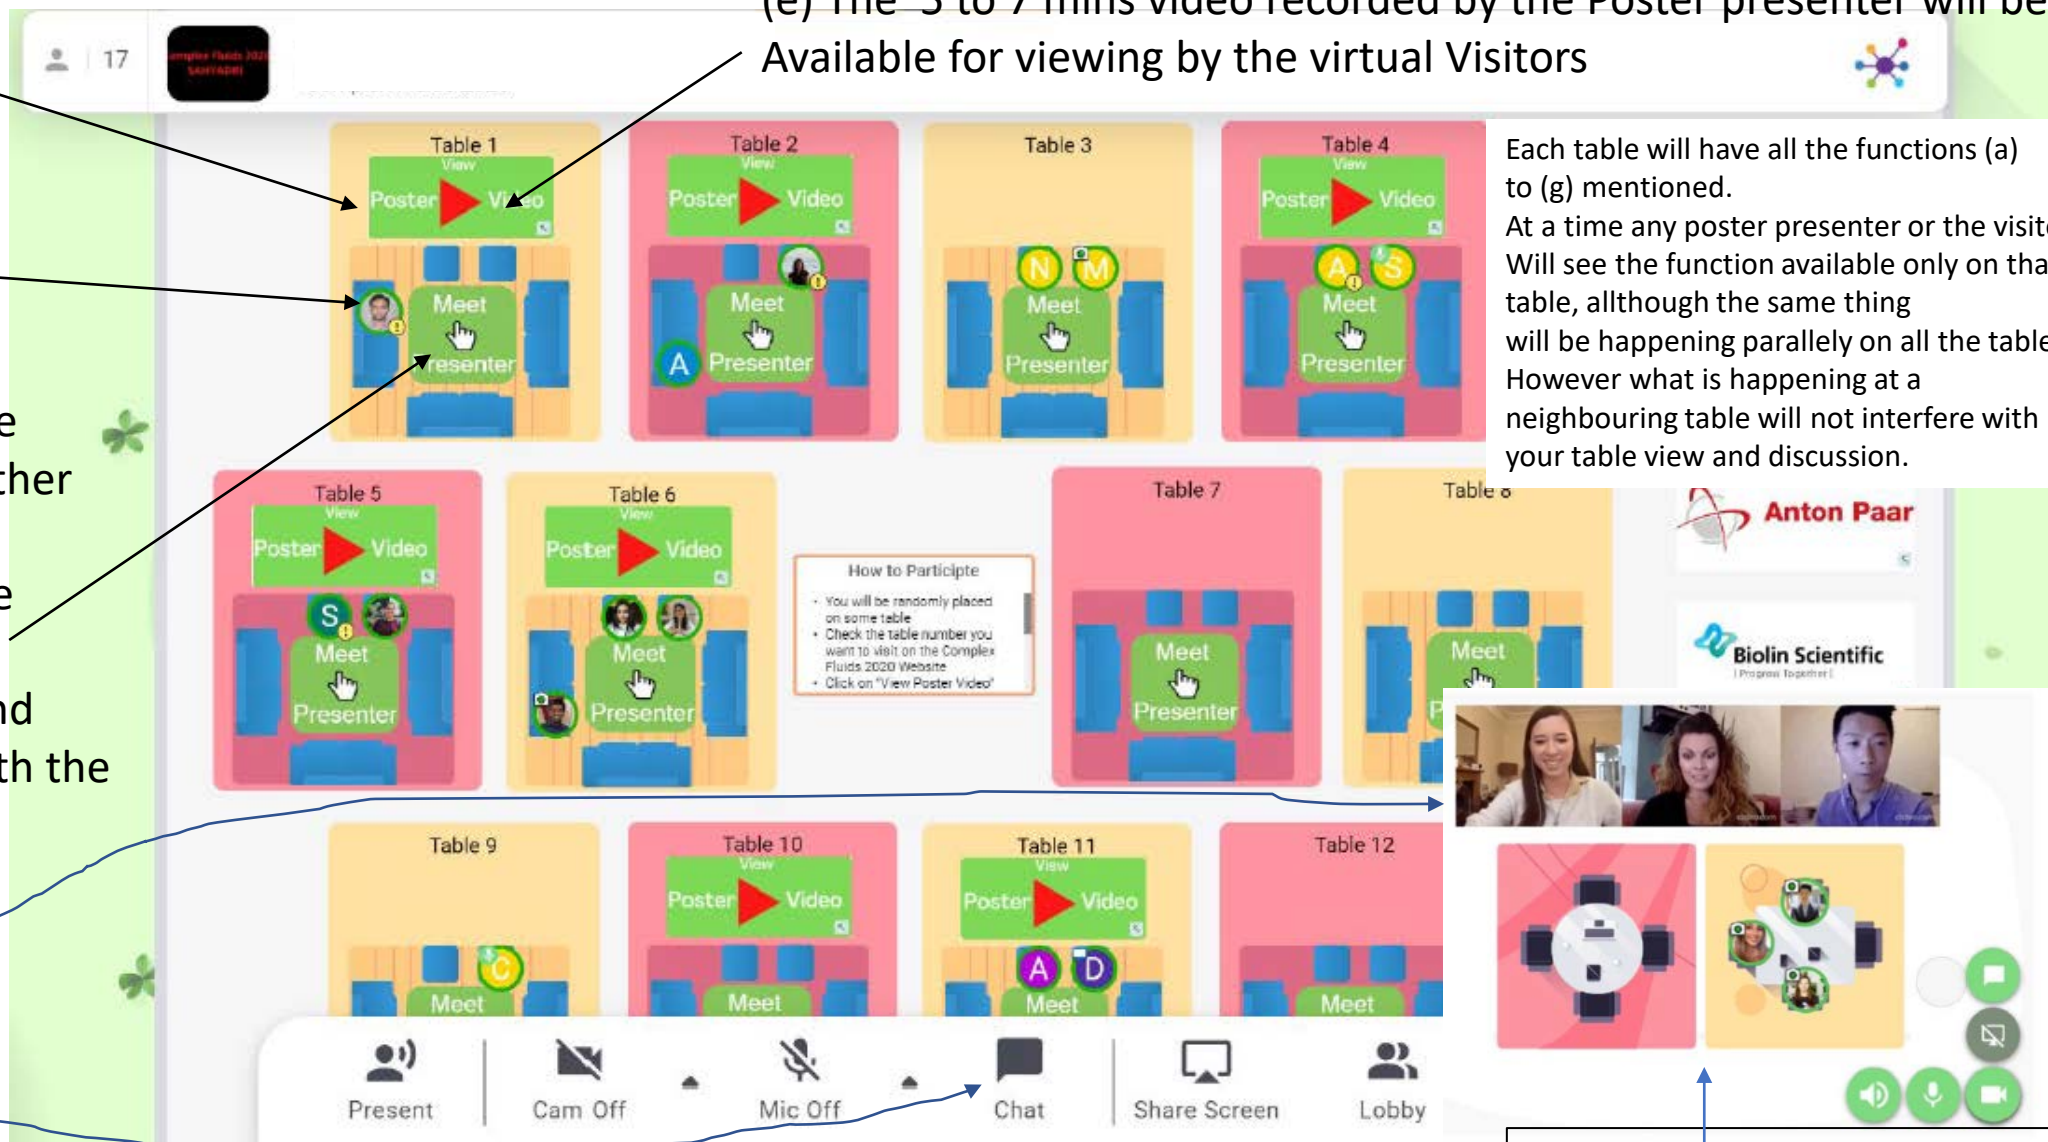

b) Eight Virtual Visitors at a time can be accommodated per Table. Visitors need to click the tables to move from one table to another

c) The presenter will be present at the table for taking questions and holding discussions with the visitors

d) Questions can be taken by presenter at each table via the chatbox available to them or via video discussion with the visitor

(e) The 5 to 7 mins video recorded by the poster presenter will be available for viewing by the virtual visitors

Each table will have all the functions (a) to (g) mentioned. At a time any poster presenter or the visitor will see the function available only on that table, although the same thing will be happening parallelly on all the tables, however what is happening at a neighbouring table will not interfere with your table view and discussion.

(f) Each Presenter at the bottom will see the controls for his/her table

(g) Example view of a table with visitors and presenters discussing with video on

Interact with Attendees in Presentation Mode

• Live Q&A allows attendees to submit questions in real time

• Attendees raise hands to get the presenter's attention

- The Platform for the speakers is similar to other popular platforms youll are familiar with
- Each Speakers will share screen to Give talk.
- Question can be asked with raise hand option. The person asking the question can also switch on their video to ask questions Live.
- Chat box will also be available for answering questions.
- The chat questions will be available to the speaker so that he/she can answer it later.

- Links will be available so that participants can move between poster presentation and Invited talk sessions.
- Sessions will be recorded (with speakers permissions). This is preferred as for some participants time zones may make it inconvenient to attend either the starting or ending session talks
